Professional Summary

Senior UI Developer with 8+ years of experience in designing and developing scalable enterprise web applications using ReactJS, Redux, JavaScript (ES6+), HTML5, CSS3, and Material UI. Strong expertise in building reusable components, integrating RESTful APIs, optimizing UI performance, and ensuring cross-browser compatibility. Experienced in Agile/Scrum environments and CI/CD deployments. Worked with global clients including HPE, Cisco, USAA, and Bank of Montreal.

Technical Skills

- Frontend: ReactJS, Redux, JavaScript (ES6+), HTML5, CSS3, Material UI, Bootstrap
- State Management: Redux, Context API
- API Integration: RESTful Web Services, JSON
- Tools & DevOps: Git, GitHub, Jenkins, OpenShift, CI/CD
- Databases: MongoDB, MySQL
- Cloud: AWS
- Methodologies: Agile, Scrum, SDLC

Professional Experience

Senior Software Engineer – Aziro (Formerly Msys Technologies) (May 2022 – Present)

Project: HPE – Object Storage (Cloud Application)

- Developed scalable React functional components using Hooks.
- Built responsive UI using Material UI and CSS3.
- Integrated REST APIs for dynamic data management.
- Optimized application performance using lazy loading techniques.
- Collaborated with backend and DevOps teams for AWS-based deployment.
- Ensured cross-browser compatibility and UI consistency.

Project: Cisco – VA Launchpad

- Developed dynamic UI forms using ReactJS and Redux.
- Integrated cloud infrastructure services through REST APIs.
- Created reusable UI components reducing development effort.
- Participated in sprint planning, code reviews, and production deployments.
- Worked closely with cross-functional teams in Agile environment.

Senior Software Engineer – HCL Technologies (Mar 2017 – May 2022)

Project: USAA – Tax Journey Dashboard

- Developed interactive dashboards using ReactJS and REST APIs.
- Automated tax reconciliation UI workflows improving processing efficiency.
- Integrated Spring-based REST services with frontend modules.
- Managed code deployments across Dev, QA, and Production environments.
- Collaborated with QA for performance testing and bug resolution.
- Worked onsite in Mexico for 1.5 years, directly collaborating with client stakeholders for requirement gathering, production support, and deployment activities.

Project: Bank of Montreal – Global Plus

- Developed responsive web pages using HTML5, CSS3, and JavaScript.
- Integrated RESTful services for data retrieval.
- Designed cross-browser compatible layouts.
- Supported production issues and deployment activities.

Education

Master of Computer Applications (MCA)

Gokaraju Rangaraju Institute of Engineering and Technology (JNTUH) – 2015
